

gastrointestinal physiology mosby physiology

Mon, 14 Jan 2019 12:52:00 GMT gastrointestinal physiology mosby physiology pdf - The gastrointestinal tract (digestive tract, digestion tract, GI tract, GIT, gut, or alimentary canal) is an organ system within humans and other animals which takes in food, digests it to extract and absorb energy and nutrients, and expels the remaining waste as feces. Wed, 16 Jan 2019 07:27:00 GMT Gastrointestinal tract - Wikipedia - Physiology. The retching phase is characterized by a series of violent spasmodic abdomino-thoracic contractions with the glottis closed. During this time, the inspiratory (inhalatory) movements of the chest wall and diaphragm are opposed by the expiratory contractions of the abdominal musculature.
