GMT lens anatomy
wikipedia pdf - Optics.
Lens (optics), an optical
element which converges or
diverges light Lens
(anatomy), a part of the eye;
Corrective lens for
correction of human vision
Lens - Wikipedia - A lens is
a transmissive optical
device that focuses or
disperses a light beam by
means of refraction. A
simple lens consists of a
single piece of transparent
material, while a compound
lens consists of several
simple lenses (elements),
usually arranged along a
common axis. Lens
