A distributed system is a system whose components are located on different networked computers, which communicate and coordinate their actions by passing messages to one another. The components interact with one another in order to achieve a common goal. Wed, 13 Feb 2019 01:18:00 GMT Distributed computing - Wikipedia - An entity-relationship model (ER model for short) describes interrelated things of interest in a specific domain of knowledge. A basic ER model is composed of entity types (which classify the things of interest) and specifies relationships that can exist between entities (instances of those entity types). Sat, 16 Feb 2019 11:37:00 GMT Entity-relationship model - Wikipedia - Operating System Concepts, Binder Ready Version [Abraham
